Nutritional and Integrative Interventions for Mental Health Disorders

Non-Pharmaceutical Interventions for Depression, Anxiety, Bipolar & ADHD

Join Vanessa Ruiz, ND, as she teaches you how to think more holistically about diagnosis, nutritional deficiencies, and hormonal imbalances that may contribute to mental health disorders. Nutritional psychology is an emerging field outlining how nutrients can affect mood and behavior. Many clients see a reduction in symptoms when integrating non-pharmaceutical interventions to treat depression, anxiety, bipolar and ADHD. You will learn the underlying causes and symptoms of these disorders, to more accurately diagnose and treat your clients.

Through case analysis, you will experience how addressing core physical and nutritional needs can greatly increase therapeutic results. You will discover the nutrients most essential to help treat your most depressed and anxious clients, and learn simple strategies that can be integrated with pharmaceutical interventions. Leave this seminar with the tools and understanding necessary to immediately incorporate these strategies into your clinical practice.
