Outline

Neurological Development

Latest research on neurological differences associated with:

Motor skills, sensory processing, language development, self-regulation and learning

Hindrances to typical brain development Structural brain differences and neurochemistry in common diagnoses and symptoms

A bottoms-up model for brain-based intervention

Video labs and hands-on brain models

Assessment of Neurological Functioning

SPD vs ADHD
Sensory vs behavior
Behavior disorders
Standardized assessment tools
Behavior analysis
Easily accessible checklists and
questionnaires

Build a Strong Neurological Foundation

Sensory-motor activities to build strong neural connections between key brain regions

Strengthen the insular cortex to improve emotional awareness

Strategies to stimulate the vagal nerve to power up the parasympathetic nervous system

Integrate primitive reflexes to enhance posture, motor control, and emotional responses

Case study: 16-year-old boy with HFA, SPD and EF challenges

Lab: 1) Acupoint tapping 2) Vagal stimulation activity

Using Neuroplasticity to Repair/Rebuild Affected Brain Structures

Restore balance between the frontal cortex and the amygdala to decrease sensory sensitivities, anxiety and aggression Auditory stimulation to facilitate a calm and focused state

Yoga and mindfulness strategies to reduce an overactive fight-or-flight response Proprioceptive, vestibular and tactile input to regulate emotional responses, reduce self-stimming, self-injury and anxiety **Lab:** 1) Joint compressions 2) Rhythmic movements

Neurochemistry's Impact on Behavior, Emotions, Motor Skills and Learning

Primary role of major neurotransmitters Signs and symptoms of neurotransmitter imbalance

Correlation between neurotransmitters, sensory processing and emotions Evidence-based strategies for neurotransmitter deficits/excesses

Case Study: 12 year old girl, trauma history, extreme tactile sensitivities, atypical social behaviors

Lab: Change your own neurochemistry now!

Targeting Higher Level Brain Centers

CBT to identify triggers and manage emotions

Behavior mapping to improve self-

Social stories and video modeling to target mirror neurons and teach appropriate responses

Programs to improve social skills and manage physiological response to conflict and stress

Token economy to address self-regulation Case Study: 6-year-old boy, off-task and fidaety behaviors

Lab: 1) Binaural beats to impact brain waves 2) Mindfulness activity to balance neurotransmitters

The Role of Medication

Perspectives on medication
Commonly prescribed medications for childhood diagnoses
Supplements to consider

Case study: 11-year-old boy, difficulty with attention, differentiating symptoms of ADHD vs. SPD

Brain Health

Nutrients for neurotransmitter production Sleep hygiene

Nature

Physical health

Use of electronics and video games **Case study:** 21-year-old with autism, severe sleep disorder, obesity

Clinical Considerations

Goal-writing
Data-tracking

Data-tracking

Limitations of research and potential risks

Objectives

- 1. Identify the major neurological differences associated with common diagnoses to inform choice of treatment interventions.
- 2. Articulate the primary roles of at least five major neurotransmitters and their clinical implications.
- 3. Select therapeutic strategies based on the desired neurological changes needed as indicated by behaviors and emotional affect to improve child's level of functioning.
- 4. Differentiate assessment tools available to determine neurological functioning in children to improve treatment outcomes.
- 5. Analyze the efficacy of current brain-based intervention strategies available for use in the school and home environments.
- 6. Summarize the scientific research related to available programs and strategies to enhance academic learning, sensory processing, emotional regulation, social-communication, and response to trauma and stress.
- 7. Implement an effective sensory program based on assessment results to immediately impact sensory processing and behavior.
- 8. Develop appropriate programs for use in homes and schools to ensure carry-over of recommended intervention techniques to improve child's level of functioning.
- 9. Use mindfulness, yoga, meditation, proprioceptive and vestibular input, sensory rooms, exercise, music, and nutrients to impact neurological change.
- 10. Select cognitive-behavioral therapy techniques based on desired neurological changes needed to improve treatment outcomes.
- 11. Determine activity and environmental adaptations and modifications to impact the central nervous system.

Gwen Wild, MOT, OTR/L, is an occupational therapist with over 25 years of experience specializing in the treatment of children and adolescents diagnosed with Autism Spectrum Disorder, Sensory Processing Disorders, neurological disorders and a wide variety of developmental disorders in numerous settings. She is the owner of Sensational Brain, LLC, and creator of the popular BrainWorks™ tools, a system for creating effective sensory diets that empowers kids to take charge of their sensory needs.

Gwen is steadfast in helping children learn to self-regulate to manage their behaviors and emotions effectively. She works directly with educators, speech-language pathologists, occupational therapists, BCBAs and other professionals in her roles as an educator, consultant to two school districts and provider of private pediatric occupational therapy services in homes.

Gwen presents worldwide on topics related to sensory modulation and self-regulation teaching practitioners, parents, and teachers who work with children and adolescents practical treatments and interventions. She has been invited to speak at numerous state and local conferences and has been featured on podcasts. Gwen has led and co-authored two research studies on the implementation of sensory strategies for the purpose of enhancing self-regulation, the most recent of which was published in a peer reviewed journal.

She is an active member of the American Occupational Therapy Association and at the state

Speaker Disclosure

Financial: Gwen Wild is the owner of Sensational Brain LLC. She receives a speaking honorarium from PESI, Inc.

Non-financial: Gwen Wild has no relevant non-financial relationship to disclose

level, she is a member of the Michigan Occupational Therapy Association.

2-Day Neuro-Based Self-Regulation **Toolbox For Children and Adolescents**

Join Gwen Wild, MOT, OTR/L, renowned self-regulation expert for this intensive 2-day course to learn clinically proven neurological approaches to address self-regulation in children and adolescents with Autism Spectrum Disorder (ASD), Sensory Processing Disorder (SPD), ADHD, ODD, OCD, anxiety, trauma, chronic stress, fetal drug exposure, and physical disabilities.

Knowing the underlying brain connections will help you better select and develop appropriate interventions for challenging behaviors, such as hyper-activity, aggression, frequent meltdowns, outbursts, extreme sensory sensitivities, self-stimulation, inattentiveness and more.

Attend this intensive 2-day course to become a leader in your field and elevate your work with children and adolescents with over 100 brain-based strategies to implement in your clinic or classroom immediately! You will leave the course being able to:

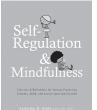

- Identify signs and symptoms of neurological differences such as neurotransmitter imbalance, hyperactivity in the insular cortex and amygdala, impaired sensory processing, and poor communication between different regions of the brain
- Form newer and stronger neural connections in key brain areas to enhance social communication, learning, sensory processing, and response to trauma or stress
- Immediately alter neurotransmitter levels to enhance focus, improve mood, and regulate emotions
- Change brain waves to facilitate a calm and organized state
- Facilitate development in certain brain structures responsible for processing sensory input, enhancing emotional awareness and regulation, and decreasing
- Simplify home programs to empower parents and teachers and ensure carry-over into the home and school settings
- Apply the science behind meditation, mindfulness, Ayres Sensory Integration™, therapeutic listening programs, and "brain breaks"

By using a bottom-up approach you can strategically select intervention strategies that strengthen the neurological foundation needed for higher skills to emerge in the children and adolescents you work with!

BONUS MATERIAL! Register today and receive FREE...

- Readily available resources including screening and assessment tools, brain-based strategies, relevant research, and helpful forms; and
- Membership to BrainWorks Online to simplify the process of creating home programs!

Self-Regulation and Mindfulness

By Varleisha Gibbs, PhD, OTD, OTR/L

Nationally known OT, Dr. Varleisha Gibbs has created a ground-breaking resource for addressing self-regulation in children. This workbook is filled with mindfulness techniques, hands-on activities, worksheets, assessments, exercises and coloring pages to engage the child in their own success.

Step-by-step Dr. Gibbs provides you with clear, concise and evidence-based strategies for treating children with sensory processing disorder, autism spectrum disorder, ADHD and similar developmental challenges.

Beyond Behaviors: Using Brain Science and Compassion to Understand and Solve Children's Behavioral Challenges

By Mona M. Delahooke, PhD

In Beyond Behaviors, internationally known pediatric psychologist, Dr. Mona Delahooke describes behaviors as the tip of the iceberg, important signals that we should address by seeking to understand a child's individual differences in the context of relational safety. Featuring impactful worksheets and charts, this accessible book offers professionals, educators and parents tools and techniques to reduce behavioral challenges and promote psychological resilience and satisfying, secure relationships.

Daniel Marston, Phil), ABPP

Autism and Independence

Assessments and Interventions to Prepare Teens for Adult Life

By Daniel C. Marston, Ph.D., ABPP

Autism & Independence is a new clinical resource to help teens and young adults with autism become their own person. Focusing on a population often overlooked, autism expert Dr. Daniel Marston wrote this game-changing guide, filled with strategies and skill building exercises.

TARGET AUDIENCE:

Occupational Therapists • Occupational Therapy Assistants Speech-Language Pathologists • Counselors • Social Workers SPED Teachers & Staff • GEN ED Teachers & Staff Psychologists • Marriage & Family Therapists Physical Therapists • Physical Therapist Assistants

Live Seminar Schedule - both days

7:30 Registration/Morning Coffee & Tea 8:00 Program begins

11:50-1:00 Lunch (on your own)

4:00 Program ends There will be two 15-min breaks (mid-morning & mid-afternoon). Actual lunch and break start times are at the discretion of the speaker.

A more detailed schedule is available upon request.

PESI Inc. is proud to offer this seminar (at these locations only) free of charge (on live seminar tuition) for veterans and active duty military personnel. Limited seats available; advance online registration required.

July 29-August 1, 2020

ADA NEEDS

We would be happy to accommodate your ADA needs; please call at least two weeks prior to the seminar date.

Walk-ins are welcome but admission cannot be guaranteed. Call M-F 7:00-6:00 Central Time for space availability if registering within one week of seminar.

- FREE Military tuition: PESI Inc. is proud to offer this seminar (at these locations only) free of charge (on live seminar tuition) for veterans and active duty military personnel. Limited seats available; advance online registration required.
- \$60 Tuition: If you are interested in being our registration coordinator for both days, go to: www.pesirehab.com/coord for availability and job description, or call our Customer Service Dept. at 800-844-8260.
- Groups of 5 or more: Call 800-844-8260 for discounts.
- Discounted Student Rate: As part of its mission to serve educational needs, PESI, Inc. offers a reduced rate of 50% off standard tuition for students. Enclose a current student schedule with registration form. Go to www.pesirehab.com/students or call 800-844-8260 for details

Advance registration required. Cannot be combined with other discounts.

Seminar on DVD or CD Package:

You can purchase a self-study package on the subject. You will receive a set of CDs or DVDs that include a digital copy of the seminar manual and post-test/evaluation. You and your colleagues can receive CE hours for a nominal fee. To determine if homestudy credits are available for your profession go to www.pesirehab.com or call 800-844-8260. Check with your licensing board to verify acceptance of self-study credits for license renewal. Order today by using the order form on this brochure or by calling 800-844-8260.

Hassle-Free Cancellation Policy:

If you contact us before the event date, you can exchange for a DVD or CD/digital manual package on the subject (self-study continuing education credit may be available), a certificate to attend another seminar, or receive a tuition refund less a \$60 cancel fee. Substitutions are permitted at any time.

Have a seminar idea? A manuscript to publish?

The nation's top speakers and authors contact us first. If you are interested in becoming a speaker, or have a new topic idea, please contact Cyndi Postlewaite at cpostlewaite@pesirehab.com or call (715) 855-5253.

Live Seminar Continuing Education Credit Information

Credits listed below are for full attendance at the live event only. After attendance has been verif d Certificate" within one week. This email will contain a link to complete the seminar evaluation and allow attendees to print, email or download a certificate of completion if in full attendance. For those in partial attendance (arrived late or left early), a letter of attendance is available through that link and an adjusted see "LIVE SEMINAR SCHEDULE" on this brochure for full attendance start and end times. NOTE: Boards do ot allow credit for breaks or lunch.

If your profession is not listed, please contact your licensing board to determine your continuing edu on home study credit availability, please contact cenesi@pesi.com or 800-844-8260 before the event.

Materials that are included in this course may include interventions and modalities that are beyond the reviewing the scope of practice, including activities that are defined in law as beyond the boundaries of practice in accordance with and in compliance with your profession's standards

PESI, Inc. offers continuing education programs and products under the brand names PESI, PESI Healthcare,

Counselors: This intermediate activity consists of 12.5 clock hours of continuing education instruction. Credit requirements and approvals vary per state board regulations. Please save the course outline, the certificate of completion you receive from the activity and contact your state board or organization to determine specific filing requirement

Educators/Teachers: This course is designed to qualify toward your professional velopment requirement. The program is 12.5 clock hours in length.

Marriage & Family Therapists: This activity consists of 760 minutes of conti education instruction. Credit requirements and approvals vary per state board you receive from the activity and contact your state board or organization to

Occupational Therapists & Occupational Therapy

continuing education Provider #: 3322 Full attendance at this course qualifies for 12.5 contact hours or 1.25 CEUs in the Category of Domain of OT and Occupational Therapy Process. Partial credit will be issued for partial attendance The assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA, Course Level: Intermediate

Physical Therapists & Physical Therapist Assistants: This activity consists of 12.5 clock hours of instruction that is applicable for physical therapists. CE requirements for physical therapists vary per state/jurisdiction. Please retain the certificate of completion that you receive and use as proof of completion when

Psychologists/School Psychologists: PESI, Inc. is approved by the National Association of School Psychologists to offer professional development for school psychologists. PESI maintains responsibility for the program. Provider #1140. PESI is offering this activity for 12.5 hours of continuing education credit. Ful attendance is required; no partial credits will be offered for partial attendance Psychologists & Psychiatrists:

Psychiatrists

PESI, Inc. is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. PESI, Inc. designates this live activity for a maximum of 12.5 AMA PRA Category 1 Credit(s). Physicians should only claim credit commensurate with the extent of their participation in the activity.

The following state psychologist boards recognize activities sponsored by PESI, Inc. as an approved ACCME provider: Alaska, Arkansas, California, Colorado orgia, Illinois, Indiana, Kentucky, Maine, Maryland, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, Oklahoma, Pennsylvania, South

area. ASHA CE Provider approval does not imply endorsement of ourse content, specific products or clinical procedures.

Carolina and Wisconsin. This activity consists of 12.5 clock hours of continuing education instruction. Certificates of attendance will be issued for you to submit to your state licensing board to recognize for continuing education credit

Speech-Language Pathologists: This course is offered for 1.25 ASHA CEUs (Intermediate level, Professional area).

Social Workers: PESI, Inc., #1062, is approved to offer social work continuing education by the Association of Social Work Boards (ASWB) Approved Continuing Education (ACE) program. Organizations, not individual courses, are approved as ACE providers. State and

rincial regulatory boards have the final authority to determine whether an ndividual course may be accepted for continuing education credit. PESI, Inc. maintains responsibility for this course, ACE provider approval period: January 27, 2017 - January 27, 2020. Social Workers completing this course receive 12.5 attendance is required; no partial credits will be offered for partial attendance. A certificate of attendance will be awarded at the end of the program to social workers who complete the program evaluation.

Colorado Social Workers: PESI, Inc. is an approved provider with the Colorado Chapter of the National Association of Social Workers. Provider #1413. This course has been approved for 12.6 continuing education hours.

Other Professions: This activity qualifies for 760 minutes of instructional conten as required by many national, state and local licensing boards and professional organizations. Save your course outline and certificate of completion, and contact your own board or organization for specific requirements.
