

Integrating MBSR into Your Clinical Practice

CERTIFICATE COURSE

Positive client outcomes are what we all strive for. Yet, over time, we can begin to feel stuck in a rut. The same treatments and methods we've become accustomed to using can start to show their limitations (and create burn-out).

A way to break through with your clients can be found within a well-researched method for teaching mindfulness called MBSR (Mindfulness-Based Stress Reduction). MBSR is clinically shown to have profound benefits on emotional and physical well-being as well as a wide range of chronic conditions. MBSR-informed adaptations are now used for the basis for many interventions, including treatment for depression, anxiety, trauma, addiction, ADHD and pain.

Attend this 3-day certificate course and you'll be immersed into an experiential workshop that will introduce and deepen mindfulness-based practices for clinicians and explore how these can be conveyed in a broad variety of populations and settings. You'll be nourished as you learn transformational mindfulness techniques and gain an in-depth knowledge of the MBSR program and all its benefits. The slogan of an MBSR approach is "There's more right with you than wrong." Come and experience how this is true.

Sign up today and learn how to embody and apply mindfulness to your patient population simply but effectively. Be renewed while getting a whole new toolbox of techniques for treating trauma, anxiety, chronic pain, depression, addictions ADHD and more!
