2-Day Certification Course

Trauma and Attachment Treatment for Children and Adolescents

Becoming a Certified Child and Adolescent Trauma Professional will demonstrate your passion for and knowledge of treating traumatized children and adolescents.

This 2-Day Certification Course in Trauma and Attachment Treatment for Children and Adolescents will provide you with the essential skills, proven interventions, and state-of-the-art treatments you need to successfully treat your most challenging clients—children, adolescents and families suffering from trauma and attachment wounds.

Children's neurology is impacted at the deepest levels of development resulting in emotional, behavioral and psychological problems. When the foundational blocks of attachment are fractured, you face therapeutic roadblocks—innate distrust of others, acting out, avoidance/shutting down, extreme reactivity, self-harm, affect dysregulation, substance abuse, poor boundaries—making successful treatment seem impossible to achieve.

Attend this intensive 2-day certification training and learn the most effective tools and techniques to help children and families more fully engage in treatment, identify and express their emotions, manage disturbing thoughts and feelings, and achieve and maintain recovery.

Elevate your practice and improve your ability to:

- Skillfully integrate proven interventions rooted in EMDR, IFS, Somatic Psychotherapy
- Unpack children's history and create a cohesive trauma narrative
- Use children's trauma narrative to process attachment disruptions and trauma responses
- Map children's problematic behavior and the parent's responses to the behavior
- Help children identify trauma triggers and develop appropriate, healthy regulation skills
- Help children overcome fears about connecting in relationships
- Repair self-destructive patterns, negative limiting beliefs and affect dysregulation
- Empower families to improve boundaries, discipline and communication
- Teach families/caregivers concrete, practical ways to repair attachment wounds

Completion of this 2-day course <u>meets ALL the educational hours should you choose to apply for certification</u> as a **Certified Child and Adolescent Trauma Professional (CATP)** through the International Association of Trauma Professionals (IATP).

To learn more about how you can apply for CATP certification and distinguish yourself from other professionals, visit <u>www.traumapro.net</u>.

Sign up today and feel the joy of setting children, adolescents and families with trauma and attachment wounds on the path to a better life!

This course counts toward the educational hours required for certification as a Certified Child & Adolescent Trauma Professional (CATP).

CERTIFIED! Visit traumapro.net for the full certification requirements.

Objectives

- 1. Articulate the neurological impact of trauma on attachment in children and adolescents and how current research informs treatment planning.
- 2. Differentiate between the clinical presentation of children and adolescents who exhibit insecure vs. secure vs. disorganized attachment.
- 3. Implement trauma and attachment assessments to develop observable and measurable treatment plan goals.
- 4. Implement the "internal working model" intervention to clarify the client's attachment category to inform treatment planning.
- Operationalize the core treatment goals into measurable objectives in the treatment of trauma and attachment.
- 6. Implement the Integrated Attachment and Trauma Timeline Strategy (IATTS) to organize and construct the client's trauma narrative.
- 7. Utilize the client's trauma narrative to process attachment disruptions and trauma responses.
- 8. Apply bilateral tapping to reduce the intensity of strong affect and/or to amplify a strength resource.
- 9. Integrate elements of Internal Family Systems psychotherapy to map out a child's problematic behavior and the parent's responses to the behavior.
- 10. Utilize bibliotherapy to teach children, adolescents and families the concepts of Internal Family Systems psychotherapy to improve treatment outcomes.
- 11. Integrate resource tapping (EMDR) into Attachment Focused Family Therapy to increase the strength of attachment and healthy regulation in children, adolescents and families.
- 12. Teach clients mindfulness-based breath work, guided imagery and sensory awareness to improve affect regulation.

PESI, Inc. is proud to offer this seminar (at these locations only) free of charge (on live seminar tuition) for veterans and active duty military personnel. Limited seats available; advance online registration required.

Hassle-Free Cancellation Policy:

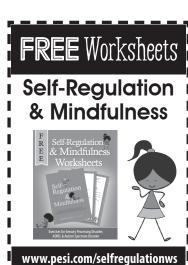

If you contact us before the event date, you can exchange for a DVD or CD/digital manual package on the subject (self-study continuing education credit may be available), a certificate to attend another seminar, or receive a tuition refund less a \$60 cancel fee. Substitutions are permitted at any time.

Seminar on CD or DVD Package:

You can purchase a self-study package on the subject. You will receive a set of CDs or DVDs that include a digital copy of the seminar manual and post-test/evaluation. You and your colleagues can receive CE hours for a nominal fee. To determine if homestudy credits are available for your profession go to www.pesi.com or call 800-844-8260. Check with your licensing board to verify acceptance of self-study credits for license renewal. Order today by using the order form on this brochure or by calling 800-844-8260.

Have a seminar idea? A manuscript to publish?

Outline

Attachment Theory and Attachment Therapy

Recent influences in attachment theory and therapy Attachment importance in the development of the healthy individual

Attachment styles vs. disorganized attachment Neuroscience supporting bottom-up therapeutic

DSM-5°: Classification of trauma and stressor-related

Neurological Impact of Trauma and Attachment

How the research informs treatment Trauma is stored/stuck in the right hemisphere Chronic activation of the fight/flight/freeze response (Amygdala issues) The reason for the stuckness

Cortisol and its impact on cognitive impairment

Indicators of Trauma and Attachment

Common diagnostic mistakes Characteristics of the children and adults View attachment as a continuum

Assessments for Trauma and Attachment **Wounds: Case Studies and Video Sessions**

Protocol to assess the strength and health of the parental/caregiver system Most effective scales, measures and instruments

Methods to explain the internal working model of the child to the parent/caregiver

Diagnostic considerations/Differential diagnosis Complex Trauma, Complex PTSD, Developmental Trauma, Disorganized Attachment, Reactive Attachment Disorder

Translate Trauma and Attachment Goals into **SMART Objectives**

Core treatment goals Relational factors between client/therapist and

child/parent/caregiver Dismantling the individual's unhealthy negative internal working model

Increase the level of affective mastery

Reduce distancing defenses Increase attachment within healthy relationships and for adults with their own children

Containment of rage, anger and pain so that resolution can occur

How to operationalize goals into measurable objectives

The Integrated Attachment and Trauma Timeline Strategy (IATTS): Help Children and Families Unpack Their History

A guide to move from assessment to treatment Techniques to clarify and construct the client's cohesive

Methods to "chunk" overwhelming and disorganized historical material

Integrates with evidence-based treatment modalities

Eye Movement Desensitization Reprocessing (EMDR) Internal Family Systems (IFS)

Attachment-Focused Family Therapy

Bibliotherapy

Expressive Therapies and Somatic Psychotherapy

TECHNIQUES WITH CASE STUDIES: PUTTING IT ALL TOGETHER WITH PRACTICE TIME!

A Child Who Had No Safety

A view of Attachment-Focused Family Therapy Healthy vs. disrupted attachment/bonding cycle Intersubjectivity and Attunement: What being in sync does/does not look like

PACE: Playfulness, Acceptance, Curiosity and Empathy Co-regulation of affect and co-creation of experiences

When Traumatized Children are Broken into Many Parts

Secure vs. anxious and avoidant attachment styles Disorganized attachment: Recognize the signs How attachment impacts parent-child dyads Integrate IFS into Attachment-Focused Family Therapy Parts work through sand tray, art strategies and puppetry

Full of Rage with No Where to Go

Integrate EMDR into Attachment-Focused Family Therapy

Teach parents and children resource tapping and positive self-talk Use tapping as part of imaginal nurturing

Calming and self-regulating strategies from EFT Naming feelings with bilateral drumming

Parts that Children Wall Off

Terrified of being terrified

The freeze of the fight-flight-freeze trauma response Help children understand their own thoughts, feelings, behaviors and experiences

The Rage that Comes from Physical Abuse

When children reenact the trauma of abuse See the positive intention in all parts Teach compassion, curiosity, calmness and connectedness through expressive therapies

When Parents and Children Both Have **Activated Parts**

Activation Parts Map: Z-Process Naming and witnessing the activated parts Helping the parts understand each other

Protecting Sibling and Self in Foster Care

Protector parts activity/worksheet

Teach children to use their inner imagination to work with their part

Transform terror into trust

Repair the Fracture with Adoptive Parents

Clarify the trauma and negative internal working model Parts mapping: Teach parts concepts to children and

Integrate Bibliotherapy into IFS

Assist parents how to engage in self-led parenting

Other Trauma-Specific Evidence-based **Treatment Modalities**

What they are used for and why clients seem to respond

Sensorimotor psychotherapy Mindfulness-based approaches including breath work and imagery

Biofeedback and EEG Biofeedback Limitations of the related research and risks of each approach

Speaker

Lois Ehrmann, PhD, LPC, NCC, CTTS, is a trauma-informed and sensitive clinician who works with individuals and families who suffer from trauma, abuse and attachment issues. She is the founder of The Individual and Family CHOICES Program, a holistic trauma-informed counseling center in State College, PA, that has been providing cutting-edge trauma-informed therapy for over 10 years. Prior to that she co-owned a dual diagnosis outpatient counseling program called Counseling Alternatives Group for over 18 years. She is a Licensed Professional Counselor in both Pennsylvania and New Jersey and has been in clinical practice for over 30 years, specializing in trauma and attachment for over 22 years.

A Certified Trauma Treatment Specialist (CTTS), Lois is also an Approved Consultant and Certified Clinician in Eye Movement Desensitization Reprocessing (EMDRIA) as well as a Certified Internal Family Systems Clinician. Trained in IFS Levels 1, 2 and 3 as well as Somatic IFS she has introduced the IFS model to the children and families she works with, as well as groups of parents of traumatized children and to professional healers who work with traumatized families. Lois is a Registered ATTACh Clinician, Certified Attachment Focused Family Therapist/Consultant and an Approved Clinical Supervisor (NCE). In addition, she is a trained neurofeedback clinician and trained in clinical hypnosis.

Lois is a sought-after trainer both locally and nationally and is also an adjunct assistant professor in counselor education and supervision at PSU. She has presented nationally for many years for the National ATTACh Conference and until very recently served on that organization's board of directors. Lois has also presented annually for the Internal Family Systems Conference specifically focusing on the use of IFS with children and families struggling with attachment issues.

Lois is the co-author of a book on best practices in attachment therapy and has self-published books for children and their parents on attachment and Internal Family Systems concepts. She was the lead researcher in the development of the Internal Family Systems Adherence Scale for the Internal Family System Foundation.

Speaker Disclosure:

Financial: Lois Ehrmann is founder and executive director of The Individual and Family CHOICES Program. She receives a speaking honorarium from PESI, Inc.

Non-financial: Lois Ehrmann has no relevant non-financial relationship to disclose.

Attachment 60 Trauma-Informed Assessr and Treatment Intervention Across the Lifespan

Treatmen

Toolbox

60 Trauma-Informed Assessment and Treatment Interventions Across the Lifespan

By Christina May Reese, LCPC, PHD

Attachment is the way that we connect to each other. Without attachment, people feel alone to deal with challenges they face, which leads to distress, dysfunction and mental health disorders. Improve your client's relationships by teaching them strategies to feel more connected, reestablish trust, and restore positive emotions. Dr. Christina Reese, a recognized attachment and trauma professional, has created a comprehensive guide that explains attachment over a lifetime, and offers trauma-informed approaches to treat attachment at any age.

Trauma Treatment Toolbox

165 Brain-Changing Tips, Tools & Handouts to Move Therapy Forward By Jennifer Sweeton, Psy.D., M.S., M.A.

The latest research from neuroscience and psychotherapy has shown we can rewire the brain to facilitate trauma recovery. Trauma Treatment Toolbox teaches clinicians how to take that brain-based approach to trauma therapy, showing how to effectively heal clients' brains with straightforward, easy-to-implement treatment techniques. Each tool includes a short list of post trauma symptoms, relevant research, application, and clinician tips on how to complete the exercise.

Attachment
