Two-Day Trauma Competency Conference

The successful resolution of traumatic stress can be simple.

Studies indicate that there are four key elements to effective trauma treatment. When you accomplish these four key elements in treatment with your clients, you will be able to reduce their symptoms and improve clinical outcomes.

Attend this conference and you will walk away with a step-by-step **four-stage framework** for navigating essential elements of trauma treatment with your traumatized clients.

The essential elements are common to all evidence-based trauma treatments, you will learn how you can integrate this framework with your current approach or methodology to make your trauma treatment even more effective!

This trauma competency training can **transform your clinical practice and help improve your trauma treatment outcomes**, just as it has for other clinicians around the world.

****In addition, completion of this two-day conference meets the educational requirements when applying to become a Certified Clinical Trauma Professional** (International Association of Trauma Professionals, www.traumapro.net)

Forward-Facing Trauma Therapy: *Healing the Moral Wound*

By J. Eric Gentry, Ph.D., LMHC **Your Presenter!**

In this groundbreaking book, trauma expert J. Eric Gentry builds upon pioneering insight to introduce Forward-Facing Trauma Therapy (FFTT), the next evolutionary leap in the treatment of traumatic stress. FFTT addresses trauma and its destructive symptomology at its source, the dysregulation of our autonomic nervous systems and hypervigilant threat response caused by adaptation to painful past experiences. Dr. Gentry provides a step-by-step guide for implementing a three-pronged methodology, and explains the how and why the techniques work so effectively.

Trauma, PTSD, Grief & Loss:

The 10 Core Competencies for Evidence-Based Treatment

By Michael Dubi, Ed.D., LMHC, Patrick Powell, EDD, LMHC, LPC, NCC & J. Eric Gentry, Ph.D., LMHC **Your Presenter!**

A holistic and systemic path of understanding traumatic stress. Key approaches and effective interventions include Feedback Informed Therapy, self-regulation, EMDR, Tri-Phasic Models, exposure-based therapies, CBT and Narrative Exposure Therapy.

Transformative Care:

A Trauma-Focused Approach to Caregiving

By Eric Gentry, Ph.D., LMHC, Robert Rhoton, Psy.D., LPC, D.A.A.E.T.S., and Thomas E. Rojo Aubrey, DBH

Transformative Care: A Trauma-Focused Approach to Caregiving goes far beyond simply defining and advocating for trauma-informed care (which has become an important new method for caregiving). Instead, it teaches the developing care provider the mastery and skillset needed to safely and effectively intervene, with a trauma-focused approach, in the lives of those who are suffering from a painful past.
