THE AGING BRAIN

Assessments, Treatments & Interventions for Alzheimer's Disease & Other Dementias

Individuals with dementia interact with a variety of professionals including nursing staff, psychologists, counselors, social workers, OTs, PTs, SLPs, home health aides, adult day center staff, and first responders.

But whatever your profession, proper skills and understanding of the disease is needed to work with this population. Without the appropriate training, safety risks grow and opportunities to improve care and quality of life are missed.

This essential training program will provide you with the tools, strategies, and practices you need to best serve patients facing Alzheimer's disease and other dementias.

In just one day you'll learn how you can better assess for and differentiate between different types of dementias, overcome the communication issues that can obstruct quality care, work more collaboratively with family and caregivers, maximize daily functioning, and safely and effectively intervene when difficult behaviors arise.

Sign up today! You can't afford to miss out on this chance to get the skills, tactics and knowledge you need to provide the best care possible for these patients!

He provides evaluation, consultation, and psychotherapeutic services to older adults in nursing homes, assisted living, and medical facilities. Dr. Steinberg provides outpatient consultation, educational, and counseling services to families and other caregivers of older adults to facilitate coping with the process of dementia.
