INTENDED AUDIENCE

This workshop is intended for masters- and doctoral-level clinicians experienced in working with trauma. In this course, you will learn and practice alternating bilateral stimulation into two distinct types of psychotherapy sessions; development and installation of internal resources; and reprocessing of traumatic material. This course assumes requisite knowledge of, and experience with, a traumatized population (i.e., clients with underlying simple or complex PTSD regardless of presenting issues).

Participants will leave the workshop with both theoretical knowledge of the current trauma paradigm as well as the practical "hands on" experience of participating in EMDR for resourcing and reprocessing trauma.
