Outline

The ACT Model

Pain vs. suffering

Language as a double-edged sword Goal: Psychological flexibility

Limitations of the research & potential risks

Components of the ACT Model

Acceptance: Foster Client Acceptance of Emotions to Increase Values-Based Action

What should be accepted?

The problem with controlling thoughts How to sidestep the happiness trap

Spot common phrases of non-acceptance Experiential avoidance

How to help clients understand acceptance **Experiential exercise:** The finger trap

Defusion: Change the Way Clients Interact with Their Thoughts

Relational frame theory & mental health Undermine unhelpful language processes Give clients skills to notice their thoughts How to decrease believability of unhelpful thoughts Aid clients in changing the functions of their thoughts **Experiential Exercise:** Notice the meaning of language

Self-As-Context: Aid Clients in Establishina Their Identities

The three different versions of the self How to describe the "observer self" to clients How to distance the self from thoughts & emotions The chess board metaphor

Experiential Exercise: "I am" exercise

Contact with the Present Moment: Strategies to Build Attention to the Here & Now

How language affects mindfulness

Goals of mindfulness ThoughtFit exercises

How do we teach clients to be mindful?

How to build focus on values

Obstacles in teaching mindfulness

Experiential Exercise: Mindfulness meditation

Values: Aid Clients in Deciding What Gives Life

What are values?

How to help clients author their values

Values vs. goals

When clients are "stuck"

Values assessment

Batteries exercise Epitaph exercise

Committed Action: Assist Clients in Behaving in the Service of Chosen Values

Persistent inaction, impulsivity or avoidance Address rule-governed behavior Exposure & ritual prevention strategies The Mindful Action Plan

ACT in Action

PTSD

Function of trauma symptoms

Experiential avoidance in PTSD

Increase psychological safety

Dominating concepts of the past & future Trauma-informed mindfulness exercises

Anxiety

Client avoidance & escape strategies

Assessment tools

Address reason-giving as a barrier Strategies to increase willingness

Anxiety Detector exercise

Depression

Values contradiction

How experiential avoidance impacts depression Fusion to the damaged conceptualized self Behavioral activation strategies

Personality Disorders

Coping strategies

Increase emotional tolerance

Target the client's story

Experiential avoidance from the therapist

Objectives

- 1. Appraise ACT concepts such as experiential avoidance and cognitive fusion in session.
- 2. Assess clients' fusion with thoughts about the past or future and illustrate mindfulness exercises to clients in
- 3. Evaluate the role of psychological flexibility in ACT and devise interventions for increasing it to improve treatment outcomes.
- 4. Determine how to reduce experiential avoidance by implementing emotional and behavioral willingness
- 5. Analyze the efficacy of exercises in values clarification as it relates to treatment outcomes.
- 6. Integrate the ACT approach into treatment to address clinically-relevant issues for specific disorders including depression, anxiety, trauma and personality disorders.

Acceptance & Commitment Therapy Made Simple

ACT for PTSD, Anxiety, Depression & Personality Disorders

Are your current techniques just not working?

You've experienced the frustration; you have a client who seems to just not break through. You've tried your best, but the outcome is the same: he or she progresses for a while, then regresses again.

Acceptance and Commitment Therapy is the popular transdiagnostic approach that you can integrate into your practice to achieve positive therapeutic outcomes with difficult-to-treat clients.

Join ACT expert and presenter Daniel J. Moran, as he delivers an exerciseand intervention-heavy course that will give you the tools you need to more effectively treat clients with PTSD, anxiety, depression or personality disorders.

You'll learn how ACT weaves mindfulness strategies with cognitivebehavioral change strategies to revolutionize client outcomes, as well as discover a variety of ACT techniques for helping clients who are struggling to make difficult behavior changes due to the presence of painful thoughts, feelings and memories.

By shifting client focus to their own values, ACT sets clients up to **embrace** behavior change that is meaningful to them while simultaneously fostering skills that allow clients to more effectively handle impulsive actions based on current thoughts or emotions.

Sign up today, and Dr. Moran will guide you step-by-step through highly practical, evidence-based ACT skills that you can apply in your practice immediately!

"One of the best seminars I've been to in years!" - Jeanette, Counselor

"I have worked with ACT for a number of years in my practice. This seminar really enhanced my understanding of how I will apply it in my practice."

-Deborah, Psychiatric Nurse Practitioner

"Dr. Moran is a passionate, dynamic presenter. I very much enjoyed this class!" - Amanda, Psychologist

Speaker

Daniel J. Moran, Ph.D., BCBA-D, is the former president of the Association for Contextual Behavioral Science (ACBS), the international ACT organization with over 8,000 members worldwide. He co-authored the first case conceptualization manual for Acceptance and Commitment Therapy entitled ACT in Practice (New Harbinger) and served on the first ACT training committee. He also recently published Committed Action in Practice (New Harbinger) and will be bringing the topic of that book to this workshop.

As a recognized ACT Trainer in the ACBS community, Dr. Moran has an engaging training style that has led him to be an invited keynote speaker for many events in the last decade.

He has also been featured on The Oprah Winfrey Network, TLC and The Discovery Channel discussing the treatment of many clinical disorders. He has published several articles and book chapters, including publications with CBT pioneer Albert Ellis and ACT pioneer Steven Hayes.

Dr. Moran supervises therapists around the world to help them treat patients in their clinics. His passion is for applying the ACT principles in important areas outside of the clinic, such as the boardroom or construction sites. He established Pickslyde Consulting in order to bring mindfulness and value-directed commitment skills to the workplace to improve safety, innovation and leadership. Dr. Moran has utilized ACT in work implementations and clinical training sites on six continents and in all 50 of the United States.

Financial: Daniel Moran founded Pickslyde Consulting. He is an author for New Harbinger and receives royalties. Dr. Moran receives a speaking honorarium from PESI, Inc.

Non-financial: Daniel Moran is a member of the Association for Contextual Behavioral Sciences.
