PROGRESSIVE CARE CERTIFICATE COURSE

CONQUER THE HIGH ACUITY PATIENT

Our patients and their families need us now, more than ever.

In today's fast-changing healthcare world, we are lacking specialty trained staff to work with some of the sickest patients in progressive care departments or overflowing to other areas in the hospital. As healthcare professionals, **we must be on our game at all times.**

Sure...you've had ACLS. But you need to go beyond that level of knowledge. You need to be able to interpret a 12 lead EKG, recognizing more than just lethal arrhythmias. Are you confident you are managing your patient's hemodynamic needs and critical care drips safely? Learn what your patients need so you can **detect the subtle, early signs of clinical deterioration...to prevent that transfer to the ICU!**

There is no room for slip-ups. There is no room for errors. It is our duty to develop and maintain the skills to help patients stabilize following crisis, recover, and get home as soon as is safely possible.

Our new **Progressive Care Certificate Course** provides you with the clinical insights and critical thinking skills you need right now - to stop feeling uncertain, scared, or at risk while on the job. Prove to patients, colleagues, and supervisors that you are committed to the highest quality of care.
