OBJECTIVES

- 1 Analyze the impact of dementia on brain structure and function, and determine the difference between "normal forgetfulness" and cognitive impairment.
- 2 Differentiate dementias from one another by identifying manifestations of each type.
- 3 Articulate differences between the Folstein Mini-Mental Status examination and SLUMS and effectively utilize them as screening measure tools for cognitive impairment and dementia.
- 4 Employ adaptable behavioral interventions that can provide patients with individualized care and promote more effective participation in therapy.
- 5 Investigate the concept of caregiver guilt and its implications for the client, clinicians, and those caring for older adults with dementia.
- 6 Correlate patients' strengths and limitations to potential therapeutic approaches when developing treatment plans for older adults with dementia.

THE AGING BRAIN

Assessments, Treatments & Interventions for Alzheimer's Disease & Other Dementias

Individuals with dementia interact with a variety of professionals including nursing staff, psychologists, counselors, social workers, OTs, PTs, SLPs, home health aides, adult day center staff, and first responders.

But whatever your profession, proper skills and understanding of the disease is needed to work with this population. Without the appropriate training, safety risks grow and opportunities to improve care and quality of life are missed.

This essential training program will provide you with the tools, strategies, and practices you need to best serve patients facing Alzheimer's disease and other dementias.

In just one day you'll learn how you can better assess for and differentiate between different types of dementias, overcome the communication issues that can obstruct quality care, work more collaboratively with family and caregivers, maximize daily functioning, and safely and effectively intervene when difficult behaviors arise.

Best of all, upon completion of this live training, you'll be eligible to become a **Certified Dementia Care Specialist (CDCS)** through Evergreen Certifications. Certification lets colleagues, employers, and clients know that you've invested the extra time and effort necessary to understand the complexities of dementia care. Professional standards apply. Visit www.evergreencertifications.com/CDCS for details.

Sign up today! You can't afford to miss out on this chance to get the skills, tactics and knowledge you need to provide the best care possible for these patients!

Target Audience:

Social Workers • Psychologists • Occupational Therapists • Physical Therapists • Nurses
Speech-Language Pathologists • Counselors • Nursing Home Administrators
Assisted Living Facility Administrators • Long Term/Acute Care Professionals
Case Managers • Marriage & Family Therapists

Meet Your Speaker

ROY D. STEINBERG, PhD, a gero-psychologist with over 22 years of experience, concentrates his work on diagnosing and facilitating treatment of individuals with Alzheimer's disease and other forms of dementia. He has lectured nationally on the assessment and treatment of individuals with Alzheimer's disease, and on increasing attention on caring for caregivers. Dr. Steinberg is the author of *Forgetting the Memories: A Caregiver's Journey Through Alzheimer's Disease* a guide for caregivers that draws upon his profound knowledge of the disease, its manifestations and treatment, and his great love and tenderness as the son of an Alzheimer's patient.

Dr. Steinberg maintains a private practice devoted exclusively to serving older adults and their caregivers. He provides evaluation, consultation, and psychotherapeutic services to older adults in nursing homes, assisted living, and medical facilities. Dr. Steinberg provides outpatient consultation, educational, and counseling services to families and other caregivers of older adults to facilitate coping with the process of dementia.
