

Outline

Executive Skills

- Underlying theory
- Executive skills in the context of brain function and child development

Assessment of Executive Skills

- Parent/teacher/student interviews
- Behavior rating scales
- Observations
- Informal assessment
- Formal assessment

Intervention Strategies

- Environmental modifications to reduce the impact of weak executive skills
- Teaching strategies to help children develop/improve executive functioning
- Using incentives to help practice or use skills that are difficult

Keys to Effective Intervention Design

- Match the child's developmental level
- Use the child's innate drive for mastery and control
- Begin with environmental modifications
- Effortful tasks and ways to make them less difficult
- Use incentives to augment instruction

Objectives

- 1 Assess the relationship between the executive skills and brain development/ function in relation to assessment and treatment planning.
- 2 Propose strategies to accommodate and strengthen weak planning and organizational skill, to improve client level of functioning.
- 3 Appraise assessment tools used to identify deficits in executive functioning to better inform your choice of treatment interventions.
- 4 Determine how executive skills impact performance and activities of daily living at home and school for the purpose of client psychoeducation.
- 5 Utilize environmental modification strategies to support deficits in executive skills thus improving treatment outcomes.
- 6 Implement strategies that transition children from being externally prompted to internally regulated.

- Provide the minimum support necessary
- Apply supports and interventions until the child achieves mastery or success
- Gradually fade supports, supervision and incentives

Coaching: An Effective Strategy for Building Executive Skills

- Description of 2-stage process
- Coaching with younger children
- Clinical case examples
- Research studies supporting the efficacy of coaching

Limitations of the Research and Potential Risks

- Limited empirical evidence for the approach
- Approach integrates evidence-based practices such as ABA and RTI
- No "one size fits all" for any treatment modality

Children who have deficient executive skills often have trouble getting started on tasks, get distracted easily, lose papers or assignments and forget to hand in homework. They make careless mistakes, put off work until the last minute and have no sense of time urgency. Workspaces are disorganized and teachers often refer to their backpacks or lockers as “black holes.” Often considered chronic underachievers, these children are at risk for academic failure as well as emotional and behavioral difficulties.

Dr. Dawson, co-author of the best-selling books *Executive Skills in Children and Adolescents*, 2nd Ed. (Guilford, 2010), *Smart but Scattered* (Guilford, 2009) and *Smart but Scattered Teens* (Guilford, 2013), uses case examples along with interactive discussion to demonstrate how the executive skills manifest in daily home and school activities. Learn how to assess these skills and take home evidence-based strategies to help children and adolescents overcome executive skills weaknesses.

Leave this seminar with a set of tools that includes strategies for task/environmental modifications, skill development through cognitive/behavioral techniques and creation of incentive systems. You will be able to give teachers and parents a means for developing and improving the following:

- Organization
- Time management
- Impulse control
- Goal-directed persistence
- Executive skills critical for independent functioning

Target Audience:

Counselors • Social Workers • Psychologists • Psychotherapists • Therapists • Physicians
Marriage and Family Therapists • Speech-Language Pathologists • Teachers
